Junior Full-Stack Web Developer looking for opportunities to grow as a developer and a person by collaborating, solving challenges, and making meaningful changes in the world.

Projects

Gifty: Gift Idea Tracker │ Full-Stack Bootcamp   Database Management/API Integration
- Uses the MERN stack to produce an interface that allows users to have a useful starting point when thinking of gift ideas. Responsible for using Mongoose.js to create an intuitive RESTful API that integrates with a custom-built NoSQL database written in MongoDB.

Unblurred: Video Game Reviews │ Full-Stack Bootcamp   API Integration/Interface Design
- Takes input from users and creates simple graphs that visualize the aggregate data of reviews and ratings for their favorite games. My responsibilities included integrating an existing API into a custom-built SQL database written with MySQL

Professional Experience

Pounds   September 2021 - September 2023
Kitchen Manager   Fargo, North Dakota
